EDUCATION:

- MCA (sikkim manipal university) : 2017
- BCA (Magadh University) : 2014
- 12th (BSEB Patna) : 2014
- 10th (BSEB Patna) : 2008

TECHNICAL PROFICIENCIES:

- **Programming Languages :-Java with Selenium (appium)**
- **Database :-** MySql
- **Operating System :-** Win(7/8/10),Linux and MAC
- **Automation Testing Tools :-**Selenium Webdriver,BDD,postman, Testng,cucumber
- **Ide's :-** Katalon Studio,Eclipse, Intelij,mysql workbench,
- **Communication Skills Language :-** English,Hindi

Project Experiences:

Project Name: Joybird

URL : <https://joybird.com/>

Description: JoyBird is a browser-based E-commerce application and this application deals with furniture shopping . It also has a kiosk application by which users can buy any product without using signup.

Responsibilities:

- Understanding the System Requirements Specification and Business Logic
- Create infra (Integration jenkins,AWS,Git,Docker,BrowserStack,JIRA)
- As per Agile Methodology, Involve in Release Planning and Sprint planning meeting.
- Creating automation test scripts and collecting test data.
- Implemented Testng,, C#, Cucumber and Selenium Webdriver to develop automation framework.
- Created reusable components.
- Cross browser testing(run tests against the various browser)
- Estimation for testing to deliver project releases as per the scheduled

deadlines

- Creating/updating test plans
- Writing & executing Test Cases
- Logging defects in bug tracker tool, prioritizing the bugs & tracking them till closure.

Project Title: Xamarin

URL : [Xamarin App Development with Visual Studio | Visual Studio](#)

Description: it is a product of Microsoft and it is a desktop application, it is a IDE so using this IDE , we can create mobile apps like native and hybrid apps.

Responsibilities:

- Understanding the System Requirements Specification and Business Logic
- As per Agile Methodology, Involve in Release Planning and Sprint planning meeting.
- Defining test strategies
- Estimation for testing to deliver project releases as per the scheduled deadlines
- Creating/updating test plans
- Analyzing the test design techniques
- Preparing Test Scenarios
- Mapping Test Cases on Requirements Traceability Matrix
- Preparing Test Environment & Test Data
- Writing & executing Test Cases
- Logging defects in bug tracker tool, prioritizing the bugs & tracking them till closure.
- Front End and Back End testing.

Project Name: Activetrail

URL : <https://www.activetrail.com/>

Description: Marketing Automation Platform by **ActiveTrail** - every Marketing Automation tool you might need in the world's leading email marketing platform.

Responsibilities:

- Understanding the System Requirements Specification and Business Logic.
- Defining test strategies and automating new test using C#- selenium
- As per Agile Methodology, Involve in Release Planning and Sprint planning meeting.
